- Curs pentru Atestat de chirurgie hepatobiliopancreatica si transplant hepatic –. Director curs.

**Competențe dobândite la locul de muncă**

**Contributii personale:**

- Introducerea **transplantului de ficat** ca metoda terapeutica in Romania (Institutul Clinic Fundeni) in anul 2000. Programul de transplant hepatic din Romania se prezinta astazi ca unul dintre cele

mai valoroase din Europa, cu 1000 de transplante de ficat efectuate în total, cu rezultate similare, în termeni de supraviețuire, cu cele din majoritatea centrelor internaționale.

În afara programului de transplant hepatic din Institutul Clinic Fundeni a contribuit la înființarea programelor de transplant hepatic:

- din Republica Moldova. (2013)
  - Spitalul Clinic Sfânta Maria (2014)
  - Spitalul Sf. Spiridon din Iași
- **introducerea chirurgiei robotice în România**, acumulând o experiență semnificativă (1000 de intervenții chirurgicale).
  - **contribuții recunoscute la nivel internațional în chirurgia pancreasului: promovarea abordului posterior și rezecția totală a mezopancreasului** în chirurgia cancerului de cap de pancreas; articole publicate în revistele Hepatogastroenterology, European Journal of Surgical Oncology și Langenbeck's Archives of Surgery; elaborarea a două capitole dedicate chirurgiei pancreatice în Tratatul Internațional de Tehnici Chirurgicale avansate apărut în 2012 în editura Elsevier sub redacția Prof. Vijay Khatri (University of California, Davis School of Medicine, Sacramento, USA).
  - înființarea programului de chirurgie a miasteniei gravis, ale cărui rezultate au fost publicate în revista Annals of Surgery, cea mai prestigioasă revistă din domeniul chirurgiei din lume.
- Contribuția la dezvoltarea cercetării în domeniu :**
- În domeniul transplantului hepatic - publicarea unor articole cu tehnici originale, unele dintre ele constituind premiere pentru România sau la nivel internațional. De menționat, transplantul cu ficat împărțit (un ficat pentru 2 primitori) și transplantul "dual graft" (2 fragmente de ficat pentru un primitor). Articolul cu transplant de ficat domino în hipercolesterolemia familială elaborat împreună cu echipa Acad. Maya Simonescu a fost publicat în cea mai prestigioasă revistă de transplant: Transplantation. Ulterior, alte 2 articole pe aceeași temă au fost publicate în Clinical Transplantation și în Liver Transplantation. S-a dovedit în aceste articole, pentru prima dată în lume, posibilitatea utilizării ficatului cu hipercolesterolemie familială la un alt pacient.
  - În domeniul **oncologiei digestive** - promovarea conceptului de "CERCETARE TRANSLATIONALA", bazată pe un număr de peste 1500 de operații cu caracter oncologic efectuate anual în Centrul de Chirurgie Generală și Transplant Hepatic "Dan Setlacec". În 2002, a fost înființată biobanca, apoi laboratorul de genomica și proteomica și laboratorul de terapii celulare. În 2013, a demarat construcția CEMT (Centrul de Excelență în Medicina Translatională) în Institutul Clinic Fundeni, cu finanțare europeană (Fondul European de Dezvoltare Regională POS-CCE). Cercetările din acest domeniu au fost orientate în special asupra colangiocarcinomului, hepatocarcinomului, și cancerului de pancreas. Rezultatele cercetărilor au fost publicate în reviste prestigioase precum : Hepatogastroenterology, Cancer Gene Therapy, Hepatology, Nature Genetics și citate în reviste la fel de prestigioase ca: Nature, Lancet Oncology, Nature Medicine, Cell. A dezvoltat colaborări cu centre de elită în cercetare: Translational Research Laboratory, National Cancer Center, Singapore, Harvard School of Medicine, Boston, USA, Johns Hopkins Uni Hosp, Div Gastroenterol & Hepatol, USA, Tohoku University, Japonia.

Întreaga activitate de cercetare a centrului condus de Prof. Irinel Popescu este prezentată din punct de vedere scientometric în articolul "Cercetarea Translatională - O evaluare scientometrică a Centrului de Chirurgie și Transplant Hepatic Fundeni" publicat în Revista Politică Științei și Scientometriei, vol.
