1. The Dean of the Faculty of Medicine

Faculty of Medicine, an integral part of Titu Maiorescu University in Bucharest along with the other faculties, wants to become a centre of excellence in education, in the training of specialists, in research and In healthcare. The faculty is internationally attested to FAMER (Foundation for Advanced of International Medical Education and Research) And WHO.

As stated by Madam Rector, Smaranda Angheni, University Professor, Ph.D, *"Titu Maiorescu University is placed, not only by name, under the spiritual authority of Titu Maiorescu, the father of culture and civilization of the modern Romanian society. As a member of the European Universities Association (EUA), International Association of Universities Take And European Association of Erasmus Coordinators (EAEC), Titu Maiorescu University actively participates in the genesis of a Education European in Conditions Present times, when only those performing And Required in a field of such Importance. Relations International The directness that UTM has with Universities In the EU, Canada And us, as well as And Participation in the European exchange programme Inter-University ERASMUS Long Life Learning Program is a Guarantee A Recognition Its value including the plan International. All this data of a Identities Very well shaped in Education Romanian superior opens a wide range of perspectives Graduates Maiorescieni, both at the level National How And International, under the generous banner of the EU"*.

Penetration into European Education Space And European Scientific Research Space could be achieved on the main ways of harnessing the Creativity Teachers And Students, through interdisciplinary cooperation And Transdisciplinary with Universities from country and abroad.

Our faculty has many achievements with a past and a present that honors us. Here are all the premises as in the future to Obtain Valuable results And To carry out training And Educating Generations of young physicians And Assistants For the best medical care of the Population. In this context, the Faculty of

Medicine perpetuates the process of developing a Institutions Modern academic system, integrated Educational National And Compatible with academic structures in Countries The European Union, in accordance with the spirit of Bologna, And Contents of the Law Education National And Of recent regulations, methodologies And Codes adopted by Institution Our new University Charter.

Together with the medical faculties in the structure of our university are And Faculties of law, Economic Sciences, psychology, informatics but And Other faculties And Specializations, currently covered by 19 bachelor's degree programs, 25 Master University studies and three Schools PhD in which didactic activity And is organised on 12 scientific areas.

Admission to studies of License In the Faculty of Medicine (English/English) And AMG shall be organized in accordance with Legislation In force. Conditions Admissions are made public including on site UNiversității. Admission is based solely on Powers Academics of the candidate in Conditions By Transparency Total without any discrimination whatsoever.

In Consistent With the development strategy And With the support of the management UNiversității The process for developing the material base of the Faculty Both for the preclinical study And For the clinical. Teaching activity for Education Preclinically Carried out Mostly in the amphitheatres in the building Faculty From the IOR, and the teaching activity in Education Clinic is Carried out In the Amphitheatres UNiversității (M bodies And V And of hospitals where He are headquartered Cutting Clinical trial with Specialities Medical records. Endowment of classrooms And A Spaces in which it Carried out Activities Practical is Differentiated In Function The specific teaching of each discipline. The classrooms have modern teaching technologies And Learning: Notebook, projector, screen, sound, etc. School Doctoral Their is headquartered at the Research Institute Scientific "Nicolae Cajal" medical.

The clinical activity of Students From the III-VI medicine And of AMG is Carried out In specialized clinics with which the university has contracts. The 16 hospitals are: Hospital Denadore, Monza Hospital, CF Clinical Hospital No. 1 Witting, CF Clinical Hospital No. 2 Bucharest, Fundeni Clinical Institute,

University Hospital Emergency Central military "Dr. Carol Davila", Institute of Pneumology "Marius Nasta", Clinical Hospital County Ilfov, Clinic Hospital, private network "Regina Maria", Psychiatric Hospital "Prof. Dr. Al. Obregia", the Institute National of diabetes, Nutrition And Metabolic diseases "Prof. Dr. N. P.T.", hospital MedLife, clinic effigy, Clinical Hospital "Dr. Victor Babeş" Nicolae Mixer" clinical Hospital. Development of collaboration between faculty of Medicine And Private hospitals have resulted in this academic year with Establishment of 5 clinics in the hospital Denadore By order of the minister. We have proposed the development of these collaborations in the light of equipment And Conditions, at European level, by Education Academic.

Examination And Notation Students is carried out in accordance with the regulation on professional Students In the European credit transfer system And

Based on the methodology for evaluating the results Learning, drawn up in accordance with Legislation In force And With *Charter University*. Students Faculty of medicine within the University Titu Maiorescu has an objective assessment And Non-

discriminatory Powers Acquired after completing a discipline of Education, observing Sheet Discipline And In accordance with the right to be Inform About the scale by which they were Rate. Teachers of the faculty use the resources of new technologies (e-mail, thematic, bibliography, electronic resources And Dialogue with Students), And Auxiliary materials. The courses are interactive, reveals the student Situations From Medical Practice And Discuss Solutions Stimulate their Students For a Learning Creative And Centered on Situations Practical. The programmes of studies offered are integrated with internships And With the involvement Students In research projects.

I would like to underline the active participation of teachers And Students to sustained efforts to assert the And Strengthening private medical education in the National University landscape, with many battles being fought to defeat prejudices And Sometimes even petty interests that were opposed to the whole

The power of recognition And To affirm a faculty of medicine in the Romanian private education system.

Along with these, we have managed to establish a faculty of medicine with pronounced entrepreneurial spirit, integrated into modern trends in globalised higher education, from this point of view being unique in Romania. The university autonomy was able to perform performances that were inconceivable 10-15 years ago, such as the fact that we have so far more than 2000 graduates, or that in recent years around 70% of our graduates have promoted the residency exam , some of them occupying the first places in this contest. Our students have been admitted to the most sought-after medical or surgical specialties, where they have proven that they can be the best, who are currently able to practise medicine in prestigious hospitals in the country or abroad or occupy management positions in Medical, governmental or international firms.

Today, Titu Maiorescu University is already a tradition of over 25 years, recognition And Academic value. This is primarily due to all those, teachers And Students, who by Abnegație and professionalism were enrolled in the spiritual heritage of the university And Which, through their sustained efforts, made it a landmark of the Romanian university system.

I would like to thank with special warmth And Trust, students And Graduates Faculty of Medicine at Titu Maiorescu University for active involvement with teachers in all projects And I want to remind them that their successes are the ones that give us new value, teachers, because only through them can we say with confidence that we are a prestigious academic institution. Must Realise That we are a strong community And Valuable And Only together will we Succeed To make medical school an example of success Education And Research Romanian.

Dean,

Prof. Univ. Dr. Cant Daniel

2. General presentation of Titu Maiorescu University of Bucharest

On 20 September 1990, a group consisting mainly of teachers met to establish, under Law No. 21/1924, independent University Association Titu Maiorescu. By civil sentence No. 59/25 January 1991, delivered by the Court of Sector 1 Bucharest, was awarded legal personality to the Association of Independent University Titu Maiorescu. The founding members unanimously decided on the election as rector of Prof. Dr. Avram Filipaş, who remained in this position until his death in the year 2006.

Titu Maiorescu University acquired legal personality as a private, non-profit higher education institution and became a legal person of private law And Public utility, part of the National education system, by Law No. 239, of 23 April 2002, published in the Official Gazette No. 291, of 30 April 2002.

Titu Maiorescu University has in its structure 10 faculties: eight faculties in Bucharest-law, psychology, medicine, dental Medicine, pharmacy, social sciences, political And Humanities, finance-banks, accounting And Business Administration And Computer science And Two to Târgu Jiu- Law and Sciences Economic And Healthcare.

In Titu Maiorescu University, all types of higher education are found: License, Master and – in the faculties of Medicine, dental medicine And Law – PhD. Study programmes, conducted in the form of education with Frequency (IF) And In the form of distance learning (ID) are varied and in a continuous diversification, so chosen that they better respond to labour market demands. Currently, in the university there are 21 programs of bachelor's degree, 25 master studies programs, and at the level of the 3 doctoral schools the didactic activity And Science is organised on 17 scientific areas. Teachers have high professional training, are prominent personalities of science, Romanian public life, members of prestigious specialty associations in the country And From abroad, members of the Romanian Academy of Sciences And Members of the Romanian Academy.

Involved in the fight for excellence, in the knowledge triangle, education-research-innovation, the university pays particular attention to scientific research And Emphasize exploratory research And Border through interdisciplinary. At the university level there is the Institute of Studies,

Research, development, innovation which, through the 9 centres of interdisciplinary scientific research, carries out an intense scientific activity.

The university is a member of the European Universities Association (EUA), the most important organisation of higher education institutions in Europe, member of the International Association of Universities (IAU), a member of the university Agency of Francophone (AUF) And Member of the European Association of Erasmus Coordinators (EAEC). Direct international

relations that Titu Maiorescu University has with EU universities in Canada And The US, as well as participation in the European inter-University exchange

programme Erasmus/Longlife Learning The Program, at which Titu Maiorescu University is affiliated, is a guarantee of recognition of its value including internationally.

Titu Maiorescu University is the only private university in the country that has been invited to participate in the European programme "MATRA", aiming to develop a national strategy for quality assurance in higher education. In December 2016, following the institutional evaluation, the Romanian Quality Assurance Agency in higher education awarded Titu Maiorescu high degree of confidence – the highest qualification that can be given to a Romanian university

Not by chance, Titu Maiorescu University is under the aegis of a profession of faith: "*Modern And Top-notch* And of a motto with profound justification in the academic reality Maioresciană: "*Education Quality, the secret of your success!*"

3. History of the Establishment And Accreditation of the Faculty of Medicine

Institution By Education Superior, with the results of Exception In the specific field of activity, the Faculty of Medicine University "Titu Maiorescu" in Bucharest, according to a Traditions Not long, but How Can be rich, has as main mission the preparation of highly qualified professionals in the medical field and other interdisciplinary areas, Showing-constantly at the forefront of research Scientific Profile of Bucharest And From us in Country.

Faculty of Medicine University "Titu Maiorescu" Works Based on the principles Education Modern, which generates Competition And Performance, in the National academic area And European. The faculty is internationally attested to: Famer – Foundation for Advancement of International Medical Education and Research And who – the World Health Organisation. From the year 2003, the faculty is registered in the Yearbook of Medical faculties, published in Philadelphia, USA, alongside other prestigious faculties of medicine in Romania.

The Faculty of Medicine, which operates within the University of Anul1990, was accredited by H.G. Nr. 944 published in the Official Gazette No. 675 of September 11, 2002, for specialization in general Medicine, with a duration of studies of 6 years, having 360 transferable credits, the form of day education.

Originally, Faculty of Medicine University Titu Maiorescu, had two distinct specializations: general medicine And Dentistry.

From the academic year 1993-1994 specialization of Dentistry became a standalone faculty, acquiring the name of the Faculty of Dentistry. In the year 2005 a The establishment of the And Authorisation of the second specialization in the Faculty of Medicine And Healthcare, in relation to the provisions of law 88/1993 And A GD No. 88 of 10 February 2005, by Address CNEAA No. 2207 dated 03.11.2005, regulated sectoral specialization by the European Community, for day education.

In the year 2009, the Senate UTM decided for managerial reasons, the reorganisation of Education In the UTM, through the unification of Faculty Medicine with the Faculty of Dental Medicine, under the title of the Faculty of Medicine And Dental Medicine, with 4 specializations: medicine, dental

Medicine, Support General Medical And Dental technique, which was approved by GD 749, Appeared In MO No. 465, of July 6, 2009. Since 2011, the two medical faculties have separated into two academic structures, Faculty of Medicine AndAnd the Faculty of Dental Medicine.

In the year 2015, the Faculty of Medicine received from ARACIS the maximum rating, the degree of "trust". Obtaining this credentials is a great achievement, but also a real test stone for Entire Academic community in our faculty. The Faculty of Medicine has its own staff that corresponds, in terms of professional qualifications, to the conditions required for the occupation of the prescribed posts. In 2017 it was Obtained From ARACIS approval of Setting up of the English-language study program.

The structure of the Faculty of Medicine during the 27 years was the following:

Decani: Prof. Univ. Dr. Zechariah Corneliu, Prof. Univ. Dr. Louis Pacheco, Prof. Univ. Dr. Dan Ungureanu, Conf. Univ. Dr. Minerva Gajic, Prof. Univ. Dr. Cristian Adrian Stan, and currently Prof. Dr. Daniel Cant.

Vice-Deanes: Prof. Univ. Dr. Andrei, Prof. FahmyProf. UNiv. DA. DAn Ungureanu, Prof. Univ. Dr. Florin Opreș, Prof. Petru Armenian, Conf. Univ. Dr. Bădulescu Adriana, Conf. Univ. Dr. Tanasi Mihai, Conf. Dr. Tudor Hârșovescu, Conf. Univ. Dr. Minerva Gajic, Conf. Univ. Dr. Gabriel Cristian And, currently 2 vice-deans: Conf. Univ. Dr. Minerva Gajic And Conf. Univ. Dr. Elena Rusu (Relations International).

4. The process of admission to the Faculty of Medicine

Currently admission to the Faculty of Medicine is Desfășorată For two cycles of university studies, that of doctoral studies.

For the cycle of Bachelor's degree, the educational offer of the faculty comprises 3 distinct areas, namely:

- Specialization of medicine in Romanian, with 6 years of study, 12 semesters, 360 credits, for which 125 seats are accredited;
- Medical specialization in English, newly accredited programme, with 6 years of study, 12 semesters, 360 credits, for which 45 seats are available;
- Specialisation in general Healthcare, With 4 years of study, 8 semesters, 240 credits, for which 50 seats are accredited.

Doctoral studies Cycle It comprises 4 years of study from which the first is dedicated to advanced studies and the other 3 years are the book of the doctoral research itself. School Doctoral the Medicine field holds 5 University professors empowered to conduct PhD theses, in areas such as surgery, orthopedics and molecular biology.

Admission is done on study programs And Forms of Education, in descending order of general environments Obtained By Candidates In the admissions contest, within the limit of Tuition Approved by ARACIS for the study programme And form of Education Those.

5. Process of Education

In the 27 years of Operation have been Prepare In the Faculty of Medicine of Titu Maiorescu University over 1800 Students Have obtained the Bachelor's degree. Graduates Faculty Our have Supported License Between 1998-2002 and the University of Medicine And "Carol Davila" pharmacy in Bucharest. Since the year 2003, the License has been Supported At the Faculty of Medicine at Titu Maiorescu University, and since the year 2008, it has been supported also in our faculty and the Bachelor's degree in general medical assistance.

Over the years, a part of Graduates (from year to year larger), were Admitted La Residency In Country And Abroad (European Community And The United States of America), and the majority of university nurses in the Faculty of Medicine are among the graduates of our faculty. The management of the Faculty of Medicine is concerned Permanently The practical preparation of Students, in this respect, a POSDRU project has been won for students ' specialty practice and improving their insertion into the labour market.

One of the indicators of Performance, it is also the fact that of over 1800 Graduates Most are Employees On Market Work in Country or from Abroad, with legal employment contract, on positions corresponding to the diploma Obtained At graduation. Exam License At the Faculty of Medicine, is held in three sessions in July, September And February, according to the methodology of Progress of the examination of License And Legislation In force. Diplomas of License They are released by Titu Maiorescu University, Faculty of Medicine.

We estimate that approximately 95% of Graduates Program of License were employed within one year from the date of the graduation programme License, Statistical data available Showing That between 60% and 70% of the graduates of the last three years (2015-2017) promoted the residency exam in both Romania and other EU countries. Also, some of Graduates Occupy posts in Institutions Public or private medical or other careers based on the License In medicine (medicines companies, specialized activity abroad, insurance, etc.).

The educational structure of our faculty consistently falls on the postulates of the Bologna declaration including the three compulsory cycles Laid down And By the Law on National Education, in bachelor studies, Masters and

postgraduate studies of specialization, Master and PhD, as well as And Lifelong learning programmes rewarded with transferable credits And By teachers with the scientific degree of doctor.

Plans for Education And The programs of the subjects were developed on the basis of a Conceptions Modern, in an interdisciplinary perspective, in Consistent With the standards International By Education

Superior in general And Of the medical staff in particular, Having The purpose of forming future specialists with a solid specialized training And General culture that puts them in a Position Advantageous in Competition For Successful Career.

More than just a simple transfer of knowledge from the teacher to the student is creating medium And Learning experiences that lead students to discover And To create knowledge themselves.

Study subjects have in addition to training skills And Skills of advice And Facilitating the processes of Learning. In the Faculty of Medicine Carried out A continuous activity of identification,

development And Implementation of new techniques for Learning Effective. The Medicine study program has integrated training internships, concomitantly with the involvement of Students In research and development projects. Methods Traditional Transmission only Information (via bulletin board or course) And have proved in time Injury, so for Relief And The efficiency of the didactic process was given a Attention Particular information on the Students On the means of teaching, Learning And Knowledge assessment.

Teaching procedures - Learning Were continuously focused on a Education Interactive, on the dialogue with Students On Importance The formative sides in didactic activity (questions from the room, short presentations or demonstration experiments). This component, along with the informative one, stimulates the Learning Creative And Contribute to Improving Permanent Knowledge, Qualities And Powers Students. Teachers Offer Consultations And Customise guidance at the student's request.

In the Faculty of Medicine there are And A regulation of Tutoriat; There are tutors for each year of study that grants Consultations According to a weekly schedule. Guidance is carried out And By Activities Extra Curricular, such as circles Scientific Student Organized by the two departments offering the image of the skills, the particular skills of a student, And Which justifies encouraging it in a particular field of activity or in a particular Function. Teachers Their Set a weekly programme of Consultations Directly And by email, offering Students The possibility to find answers to the various specialized issues that Keep Teacher's field of attendance And Not only. Thus, teachers knowing the skills And Their level of readiness, they can customise Relationship Teacher-Student guiding the student in the choice of future specialization And A specific job.

Meeting with Graduates And With future candidates taking place in the manifestation "Gates Open ", Prilejuieste Students Chance A direct dialogue with Graduates, recently become practitioners in the medical field And Provides the most eloquent sample

of professional guidance through Force Example Success Graduates Our, practicing and Tutoriatul Between high-age students And Other students And Between graduates And Students.

In this context, based on the permanent assessment of Education As a system And Process, the Faculty of Medicine is concerned with adapting its programmes of Educational And Research at Trends of progress of ScienceTechnology And Culture, to the needs of Society Romanian, as well as And Compatibility with the programs of other Universities And Academic bodies And Professional Skills from Country or overseas.

Currently, the first specialization of medical education, accredited by H.G. No. 944 published in the Official Gazette No. 67, the form of day education, works with a duration of studies of 6 years, 360 transferable credits, having over 5800 hours of theoretical training And Practice, completed by license exam.

The second specialization of accredited general health care, works according to H.G. 676/2007, the form of day education with a four-year study duration, 240 transferable credits, having at Little 4600 hours of theoretical training And Practice, completed by license exam.

Postgraduate courses organized by the Faculty of Medicine, Underway Following an annual plan, with the following thematic structure: Postgraduate course of functional medicine in conjunction with Italian specialists, postgraduate course of laparoscopic surgery, postgraduate course of nursing home care, course Postgraduate resuscitation of the newborn, postgraduate course on treatment of neo-natal Asfixiilor, postgraduate course of medical malpractice, postgraduate course of integrative Medicine, postgraduate international course in Oxygen-Ozone, postgraduate course "Prevention and response of civil society to the bioterrorist attack".

6. Facilities And Material Basis of the Faculty of Medicine

The university has state-of-the-art educational spaces — Magna hall, classrooms, seminar halls, reading halls And Amphitheatres, specialized laboratories equipped with state-of-the-art equipment: Medical equipment, computer network, Wi-Fi, equipment for Videoconference, Smart Backgammon etc. University has dorms-hotel, dining room-restaurant, club Student, Centers of Assistance Medical And Copy-Center.

The faculty has Spaces By Education State-of-the-art amphitheatres, lecture halls, seminary and reading rooms equipped with smart backgammon, library, publishing house,

bookstore, specialized laboratories with state-of-the-art equipment Generation, medical equipment, Network Informatics, equipment for Videoconference Etc. Concerned with the comfort of students and teachers, the university makes available to them in a pleasant environment, loaded by Elegance And Refinement, Club Student Leisure Place And, alike, host of debates Scientific And Conferences On topics of Life Student, gym, cafeteria-restaurant and two dorms-hotel. On campus there are two health care centres (general medicine

and Dental Medicine) serving both the needs of the university community, as well as the local community.

Through the Psychological Advisory Center And Career guidance (CCPOC), advice is provided So Students But and master, having As Missiona To

increase their Gajabilitatea year. Career advisors within the centre support students in the process of self-knowledge, identifying strong points And of issues that require improvement And It helps them plan their career after graduating from studies. CCPOC organizes programs that develop And Practice Skills And Skills that young people need to integrate into the labour market: preparing the

Portfolio for employment, simulation of interviews, presentation skills And Time management, Skill strategies: Information Advisor And Career guidance, project manager, trainer, Human resources inspector, HR manager. To facilitate a direct link with potential employers, job fairs are organized annually at the university, company presentations And Discussions with professionals from different fields of activity to ensure an updated level of information for students.

Preclinical disciplines operate within the IOR building where the following disciplines work:

- Anatomy Lab, from Demi-Soil Building Of the IOR, is a modern laboratory of Conception Private.
- Physiology Lab And Pathophysiology, is equipped with modern equipment And Necessary materials for the study.
- Histology Laboratories, cellular biology And Genetics, fully equipped with specific equipment to the current standards required for a quality education process.
- The biochemistry lab, which is still on the second floor, has been completely renovated And Benefită Modern current endowment.

Currently, collaboration with hospitals has been extended to 12 hospital units, public And Private, based on collaborative contracts:

Denadore (from 2017, the first private clinical hospital in Romania), Monza Hospital, private network "Regina Maria", cf Clinical Hospital No. 1 witting, CF Clinical Hospital No. 2 Bucharest, Fundeni Clinical Institute, University Hospital Emergency Central military "Dr. Carol Davila", Clinical Hospital County Ilfov, Clinic Hospital, "Prof. Dr. Al. Obregia", the Institute

National of diabetes, Nutrition And Metabolic diseases "Prof. Dr. N. P.T.",

Institute of Pneumology "Marius Nasta ", hospital MedLife, clinic effigy, Clinical Hospital "Dr. Victor Babeş" "Nicolae Mixer" clinical Hospital.

The partnership agreement with the private health Network REGINA MARIA materialized by putting into service the centre for Diagnosis and treatment

Titu Maiorescu, based in the M Corps of our university, on the ground floor. Thus, the foundations of healthcare professionals who will be consulted in the cabinets of the centre of the And

Providing free medical services, teachers And Students of our university. We mention, in this context, And The facility offered to all students UTM from IF, which is awarded, on a card basis, free medical assistance in this medical network.

For the best Students Medicine Grants Scholarships Excellence And Merit Scholarships, grant system with criteria, mechanisms And Transparent, non-

discriminatory, carefully monitored procedures. "Titu Maiorescu" University has social, cultural services And Sporting for Students How are: Spaces Accommodation, sports base, different advisory services, which have a

Administration E Effective. UTM also offers various services Students And has special programmes for ensuring a Lives Student Quality, which it monitors And Evaluate them periodically.

Also, since the academic year 2018-2019, The Faculty of Medicine started the design and, as soon as possible, the construction of a new building body adjacent to the space already existing in the IOR building. This new space, made at the newest and highest architectural standards, will hold amphitheatres, seminar halls, a cafeteria-Restaurant for both students and teachers as well as laboratories for fundamental preclinical disciplines. These laboratories will increase both the teaching capacity of the faculty but or extend it is also the capabilities of scientific research, where activities can be carried out. It is also the capabilities of scientific research, where activities can be carried out. It is also the capabilities of scientific research, where activities can be carried out. It is also the capabilities of scientific research, where activities can be carried out.

7. International Relations

In the Erasmus programmes And Socrates, Faculty of Medicine University Titu Maiorescu carried out contracts of cooperation with the Faculty of Medicine in Lyon, then Faculty of Medicine in Paris, University of Coruna, Sapienza University of Rome And Faculty of Medicine in Innsbruck, Following For the future to debut And Collaboration with other Universities European area. Within this programme are Laid down Mobility So For Students CÂT And For teachers, on different periods, by one or two semesters.

In this respect, aiming at the internationalisation of medical education in our university, the management of the Faculty of Medicine has ensured over the years the achievement of the following main objectives, necessary for effective international cooperation:

- Ensuring institutional management of the programme Longlife Learning Programme And Coordination of all international activities,
- Mobility students And Teachers
- Organization and monitoring of education programmes and relations with medical education institutions in the European Community (such as programmes with Innsbruck, Paris, Vienna, Sapienza, AKH Vienna, Tel Aviv, Coruna And Bergamo),
- Cooperation with the National Agency for Programme Combarelles In the field of education And Training (ANPCDEFP).

In addition to the funds needed to develop Activity Faculty of Medicine Uses And Funds from external sources (through Community programmes – ERASMUS), with the help of which is achieved, on the one hand, the widening Relations International with Universities In the European Union, and by Higher Performed by teachers And Students, the qualitative increase in the process of Education And Research.

Faculty of Has studies partnerships in the Erasmus + programme with the Prestigious higher medical education institutions, such as:

- France: By Universite Paris VII;
- Germany: By MediClin And Technische Universität Dresden
- Italy: By Policlinico Di Monza, UNiversità DEgli STally Di Mllana Blcocca, Perugia University and Aldo Moro Universitat In Bari;
- Bulgaria: Through Plovdiv Medical University and Pleven Medical University;
- Turkey: By Celal Bayar Universitesi, Suleyman Demirel Universitesi, Kirrikkale University Cumhuriyet University, Mustafa Kemal University and Medipol University
- Spain: By Universidad Catholic San Antonia de Murcia.

In the academic year 2017 – 2018 Faculty of Medicine opened a new ERASMUS + partnership with the University of Barr-Ilan From Israel.

8. Scientific Research and Academic Visibility of the Faculty of Medicine

Students of both the Faculty of Medicine are Frame In circles Scientific Student of clinical disciplines And Preclinical, being Oriented To the topics related to the faculty profile. The Faculty of Medicine, draws up their own research plans, which both care about teachers as well as And Students. The results of the scientific research of teachers are harnessed by participation in national and international congresses, symposia or conferences, publications of articles in specialty magazines, monographs or treaties.

Research projects have been Financed Originally From the resources of the coordinated disciplines, Projecting-It And Attracting the proposed topics of some sources of Financing External (research centres, grants, collaborations International), similarly to the other Faculties Of University.

Research activity Scientific From the Faculty of Medicine, is coordinated by a Research Council Scientific And It is carried out through scientific research

centres under the executive leadership of the Institute of Medical Scientific Research "Academician Nicolae Cajal" of University

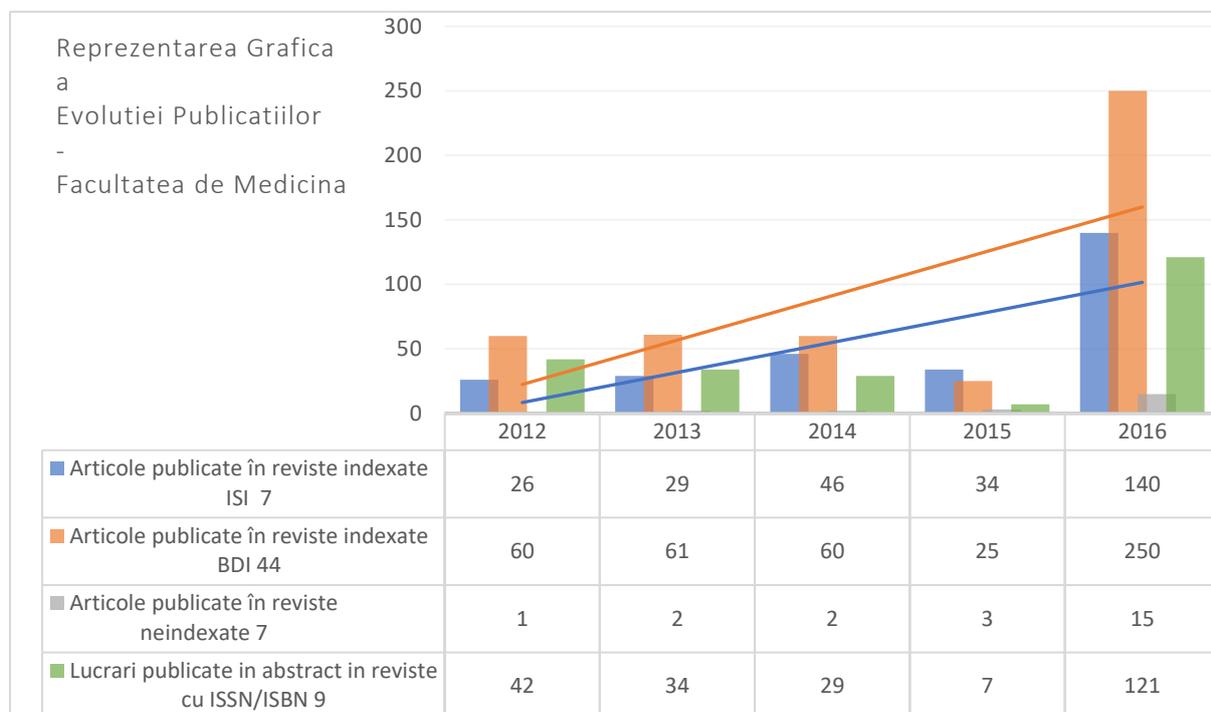

The. It is a medical research institute, Fundamental And The major objective of the research TranslationalWith Directions Research:

- Deciphering cellular mechanisms And Underlying underlying diseases with an impact on the Society Human (cancer, diabetes, etc.)
- Identification And Evaluation of possible Targets Therapeutic And Treatments using advanced technologies like Geonomica, proteomică, in connection with derivatives Omice Modern as Interactomica, Oncology-Proteomics, Oncology-Genomics.

Functionality The Institute is Based On a detailed infrastructure described on the ERIS platform ([Http://erris.gov.ro/Medical-Research-Institute-N](http://erris.gov.ro/Medical-Research-Institute-N)), the infrastructure Serves Technologies of: Genes Microarray, Xmap Multiplex Array, RT-PCR, Dot-Blot, Western Blot, cell cultures, Transdiferentiere, experimental models in vitro And Vivo Biobank). Infrastructure And The expertise of the Institute of Research Medical Academician Nicolae Cajal is a support for teachers from the University Titu Maiorescu for bidding And Project development in Competitions Future.

Research Scientific By Students From Medical specializations Carried out Especially in the Circles Scientific Organized by the Departments Faculty And The organisation of events Scientific Student Own, as well as And Works to which Students They are authors with master teachers. The best works are awarded according to the university's own methodology.

Research projects in the activities of the centres are diverse: elaboration of studies And Applicative Research on Oncology Genomics, modern technologies for the manufacture of prosthetic materials And Assessment of their resistance to stress-Site Biomechanical, medical responsibility And Malpractice, clinical Management, traumatology Cranio-Cerebral and Politrauma, Medical ethics And Applied bioethics, telemedicine, diagnosis and modern treatment in cardiology, liver transplant, laparoscopic surgery And Bariatric, child neuropsychiatry, Diabetologie, advanced neonatology and pre-treatment-maturity, disaster medicine, proteomics And Geomică Etc.

Since November 2007, Titu Maiorescu University of Bucharest organized the first international conference entitled "Education and creativity for a knowledge-based society", which met a broad participation of a significant number of Teachers from other faculties or universities in the country And From abroad. The conference was also carried out on sections, including medicine, reaching 2018 to the Twelfth Edition. This conference also benefits from a volume of published works *In the Outtense*, by sections, being indexed in a prestigious international database (BDI), namely SSRN, adding visibility to the works by their readiness to be accessed by the scientific search engines.

Faculty of Medicine has partnerships with Prestigious Magazinee Profile such as the magazine Medical Connections, Romanian Journal of Dentistry, Romanian Forensic magazine, modern Medicine Magazine And The ORL.RO magazine edited by the College of Bucharest physicians who have B + classification being indexed BDI and which have in the composition of scientific councils teachers from the Faculty of Medicine of UTM. Also, as of 2016, the Journal of Mind and Medical Sciences (JMMS) edited by UMF Carol Davila in partnership with Valparaiso University, USA, indexed Web of Science Core Collection, is composed of editorial body teachers from the Faculty of Medicine.
